Firewall protection is enabled

On

Your computer is protected against intrusion and unwanted Internet connections.

Off

A firewall protects your computer from intrusion and unwanted network traffic and helps you manage inbound and outbound Internet connections.

کلیک کنید

Advanced...

Personal information protection is enabled

On

Personal information cannot be transmitted over the Internet.

Off

Personal information protection blocks the transmission of sensitive and confidential information over the Internet.

Advanced...

Password Vault

The Password Vault is a secure area where you can store and protect your personal passwords. No other users can access them.
