Protection mode of your computer in the network

Choose the desired protection mode of your computer in the network:

Subnet: 192.168.1.0 / 255.255.255.0

 **Strict protection**

Your computer will not be visible to other computers in the network (e.g. your shared folders or printers will not be visible from other computers in the network). This mode is suitable for wireless connection.

کلیک کنید

 **Allow sharing**

1

Your computer will be visible to other computers in the network (e.g. your shared folders or printers will be visible from other computers in the network). This mode is suitable for home or office.

Rules Zones

Rules define how the firewall will handle network communication. Rules can allow or deny communication for particular applications, remote computers and specific ports. For more information about rules, click [here](#).

[Toggle detailed view of all rules](#)

Application / Rule	Trusted zone in	Trusted zone out	Internet in	Internet out
+ Rules with no application assigned	≡ Specific	≡ Specific	≡ Specific	≡ Specific
+ Host Process for Windows Services	≡ Specific	≡ Specific	≡ Specific	≡ Specific
+ Services and Controller app	≡ Specific	≡ Specific	≡ Specific	≡ Specific
+ Local Security Authority Process	≡ Specific	≡ Specific	≡ Specific	≡ Specific
+ Windows Logon Application	≡ Specific	≡ Specific	≡ Specific	≡ Specific
